Martand Prakhar

+91 9241485336 | prakharmartand755@gmail.com | LinkedIn | GitHub | LeetCode

Technical Skills

Languages: C++, JavaScript (ES6+), C
Frameworks & Libraries: React.js, Node.js, Express.js, Tailwind CSS, Material UI, Vite
Databases: MongoDB, Mongoose, MySQL
Developer Tools: Git, GitHub, Docker, Docker Compose, Postman, Render, Vercel
CS Fundamentals: Object-Oriented Programming (OOP), Data Structures & Algorithms, MVC Architecture, REST APIs, Authentication (JWT, Passport.js)

Projects

MoneyTrack: Personal Finance Tracker | **GitHub** | **Live Demo** April 2026 – Present

- Developed a full-stack personal finance tracker using React, Node.js, Express.js, and MongoDB, engineering a scalable solution to securely manage user income, expenses, and transaction history.
- Built JWT-based authentication protecting user-specific financial records across all protected REST endpoints.
- Built responsive dashboards with category-wise expense visualization and monthly financial summaries using interactive charts.
- Implemented CSV and Excel export functionality, enabling users to download their complete transaction history for offline analysis.
- Dockerized frontend, backend, and MongoDB using Docker Compose for seamless one command local development, deploying the application via Vercel and Render.

ElectiSelect April 2026

- Collaborated in a team environment to build the project architecture and establish the structural foundation, utilizing Git and GitHub for multi-person version control.
- Managed project assets, pull requests, and component integration, ensuring smooth cross-functional team coordination and code quality.

Wanderlust: Accommodation Booking Platform | **GitHub** | **Live Demo** June 2025 – Sep 2025

- Developed a full-stack accommodation booking platform using Node.js, Express, and MongoDB, adhering strictly to MVC architecture and RESTful design principles.
- Implemented Passport.js authentication and role-based access control to secure user and administrative routes.
- Integrated Cloudinary for robust image upload, optimization, and scalable cloud-based media storage.
- Implemented server-side validation using Joi to ensure data integrity and prevent malformed database entries.

Data Structures & Algorithms

Solved 180+ algorithmic problems across arrays, trees, graphs, heaps, dynamic programming, and backtracking on LeetCode.

Education

Dayananda Sagar College of Engineering Bengaluru, India

B.Tech in Information Science and Engineering — CGPA: 8.83/10 *2024 – 2028*

- **Relevant Coursework**: Data Structures, Algorithms, Database Management Systems, Operating Systems, Quant Aptitude, Object-Oriented Programming.
